

FOR SALE

IGUANA SPORT

This custom Iguana Sport Exclusive is the most advanced amphibious boat ever made. On top of its very well-known capabilities, it features an electric pod that allows you to get on and off the shore under electric propulsion before unleashing the full power of the outboards. The extended battery capacity provides plenty of range, the electric day head is very spacious, and all the options you could think of are available.

This boat was commissioned by a very demanding owner who has since changed his plans and now wants to sell it. At this asking price, it's a bargain.

If you have a waterfront property or are you looking for the ultimate yacht tender. This is the deal of the year.

Contact us now to learn more and seize this opportunity.
